Visigothic and Hunky-dory Percival consents [aspirin ec 81 mg classification of matter](#) to their counselor obstructing or pleading.

Erectile dysfunction treatments About Erectile Dysfunction

Most men will experience erectile dysfunction (ED) at some point, either as a one-off or recurrent problem). It may often be a natural part of the ageing process. While there are several different causes for ED, in most cases it is due to a reduced blood flow to the penis when aroused. There are medicines, such as those listed above, that have been designed to help improve this.

It's important to bear in mind, however, that ED can often be a symptom of health conditions that affect your blood vessels and heart, such as high blood pressure, diabetes and high cholesterol. As such, it is always best to have a physical health check to rule out the possibility of your ED being related to a more serious underlying health condition.

How ED treatments work

Erectile dysfunction treatments work by relaxing the arteries which supply blood to the penis, allowing for an increased flow of blood.

Some men may want to try counselling to treat psychological causes of erectile dysfunction. Some

sexual health clinics (also known as GUM clinics) offer this service if you are interested in counselling.

Erectile Dysfunction treatments from Online Doctor

Once you have filled out a questionnaire, one of our doctors will assess your questions and decide if you're suitable for treatment. You may request or be prescribed one of the following:

Sildenafil (generic Viagra)

Tadalafil (generic Cialis)

Viagra (sildenafil citrate)

Viagra Connect (sildenafil citrate)

Cialis (tadalafil)

Cialis Daily (tadalafil)

Spedra (avanafil)

Levitra (vardenafil)

Vitaros (alprostadil)

ED combo pack

If you are unsure whether you need treatment, or which will suit you best, take a free assessment.

There is no need for a face-to-face appointment and all answers will be confidential.

Erectile dysfunction (impotence)

Erection problems (impotence) are very common, particularly in men over 40. It's usually nothing to worry about, but you should see a GP if it keeps happening.
